

How to set up a Temi + Zapier Zap

In this doc, I'll walk you through setting up a Zap. For this example, I'm going to set up a Zap that will automatically send any email in my inbox I tag with the "Transcribe" label (or any other label in your gmail) to Temi.

Setting up your "trigger"

1. Login to/create your Zapier account

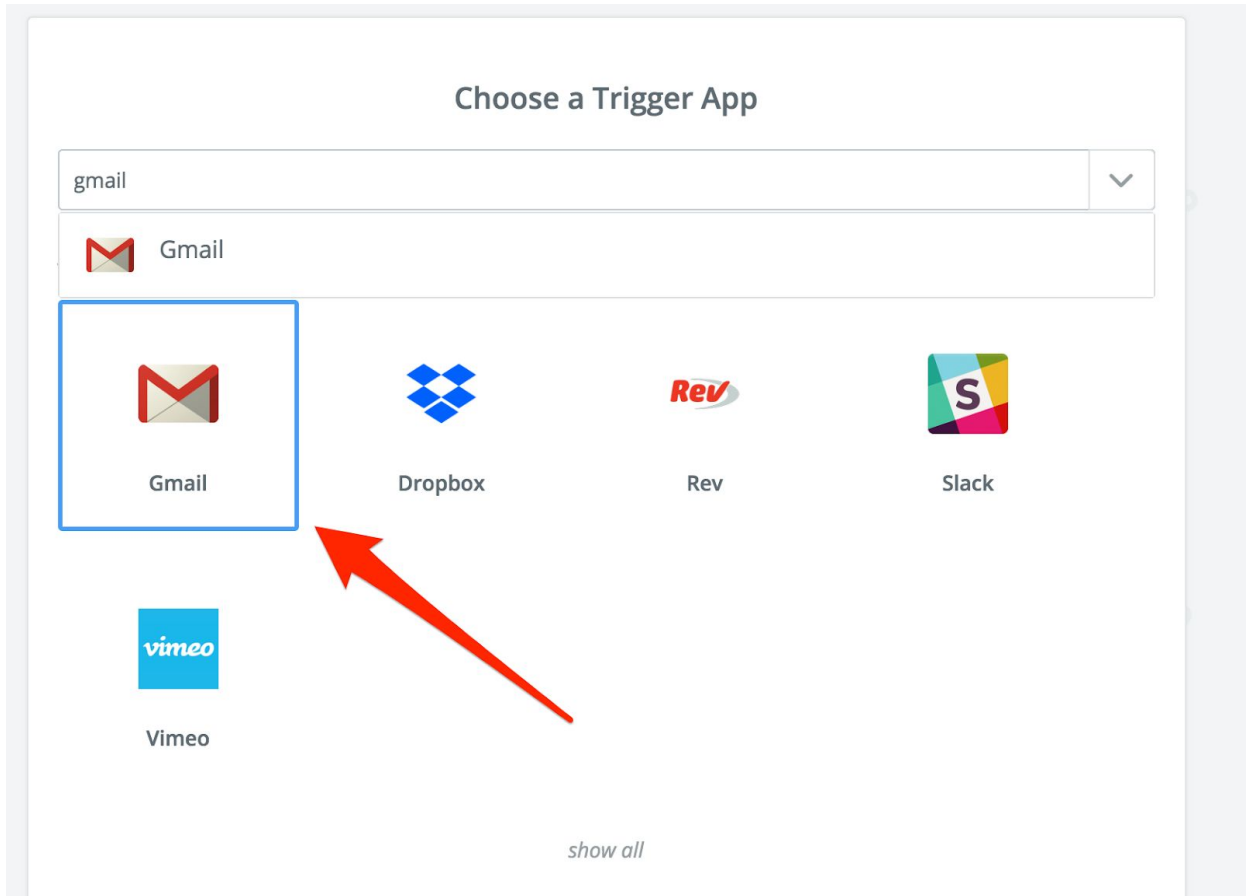

2. Click "Make a Zap"

Pick Apps to Explore Workflow Ideas

3. Choose a "trigger" app. In this example, I'll choose gmail.

4. Choose a "trigger" to act on. In this example, I'll choose "when a new email appears in my mailbox".

Select Gmail Trigger

Search Gmail Triggers...

- New Email Matching Search**
Triggers when you receive a new email that matches a search string you provide.
- New Labeled Email**
Triggers when you receive a new email and label it within two days.
- New Attachment**
Triggers when you receive a new attachment (triggers once per attachment).
- New Starred Email**
Triggers when you receive a new email and star it within two days.
- New Thread**
Triggers when a new thread starts.
- New Email**
Triggers when a new e-mail appears in the specified mailbox.

Continue

5. Connect your "trigger" app account.

Connect Gmail + Zapier
We need permission to connect to your Gmail account to trigger this Zap.

Gmail jay@rev.com
jay@rev.com added 7 days ago, used in 1 Zap

Test

Connect an Account

Save + Continue

6. Configure options for your "trigger"

Set up Gmail Email

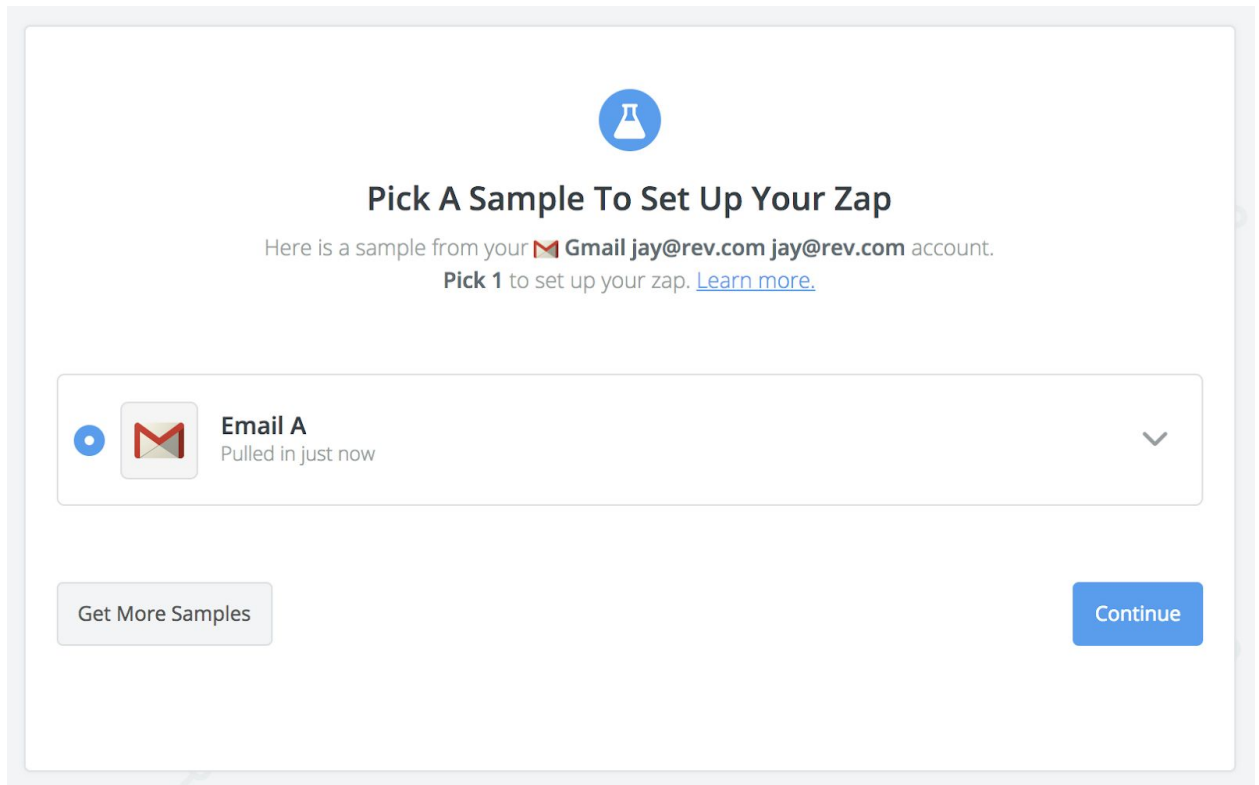

Label/Mailbox (optional)
(Note: If no Label/Mailbox is selected, this Zap will trigger on all e-mails, including Drafts.)

Transcribe

Refresh Fields

Continue

7. Pull in a sample to test your app. This is making sure your "trigger" will fire when it's supposed to. In this example, I went and tagged an email as "Transcribe"

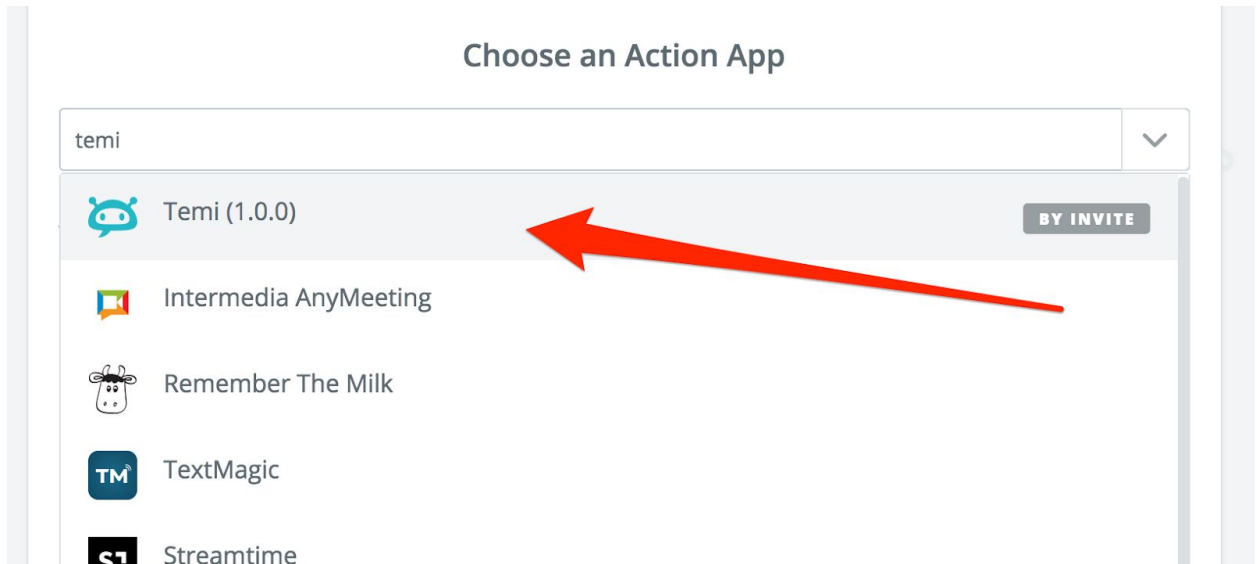

Your "trigger" is now set up. It's time to set up the "action" that will take place when your "trigger" is activated!

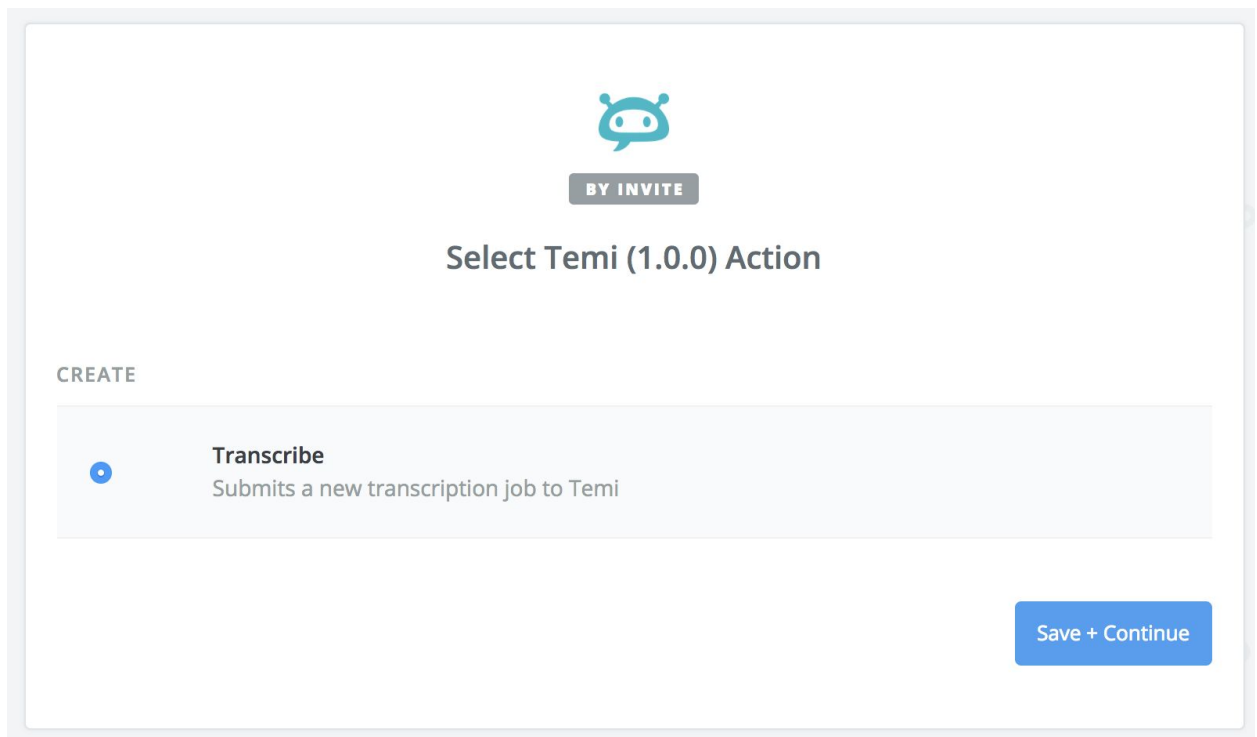

Setting up your "action"

On this side, we'll be setting up the integration with Temi

1. Search for Temi and choose it as your "action"

2. Choose "Transcribe" as your "action"

3. Click connect your Temi account

The screenshot displays the Zapier interface for connecting a Temi (1.0.0) account. At the top, there is a logo with the Zapier and Temi icons and a 'BY INVITE' button. Below the logo, the heading reads 'Connect Temi (1.0.0) + Zapier' followed by the text 'We need permission to connect to your Temi (1.0.0) account to run this action.' A search bar is present with the placeholder text 'Search your Temi (1.0.0) Accounts...'. Below the search bar, there are two account entries. The first entry is 'Test Test Test' with a 'Test' button. The second entry is 'Temi (1.0.0) 44.5' with a 'Test' button. At the bottom left, there is a 'Connect an Account' button, which is highlighted with a red arrow. At the bottom right, there is a 'Save + Continue' button.

- To connect, you'll need to login to your Temi account and go to <https://www.temi.com/account/developer>. You can generate a key there.

Developer Settings

Important: Save your API key somewhere safe. You will only be able to see your key once. If you lose your API key, you'll need to generate a new key. This will invalidate your old API key.

API Key + RE-GENERATE

Warning: you have an existing key

- Copy your key and input it

Allow Zapier to access your Temi (1.0.0) Account?

API Key (required)

Go to <https://www.temi.com/account/developer>

Yes, Continue Cancel

6. Configure your template. In this case, I'll be sending "all attachments" of the email. In other cases you may instead choose "File" (Dropbox, Google Drive, etc) or choose "Video_URL" (Vimeo, Youtube, etc)

BY INVITE

Set up Temi (1.0.0) Transcribe

Setup Preview [Learn more](#) ON

Media Url (required)
A url that points to a media file

1 New Email

Body Plain

Subject Transcribe this

Body HTML `<div dir="ltr">
</div>`

Date Tue, 19 Jun 2018 11:47:44 -0700

All Attachments (Exists but not shown)

ID 164195fc92c6d426

From Name [unclear]

7. Test your "action"! You should see it appear in your Temi Dashboard (**don't worry about losing credit. We deposit an hour of credit into your account for you to test with.**)

 >  Send Test Transcribe to Temi (1.0.0)
To test Temi (1.0.0), we need to create a new transcribe. This is what will be created:
